Homework: Test All 22 Assigned Examples

Check and complete all 22 assigned example tests in your own project.

Individual work • Up to 60 minutes

Use all 22 assigned examples. Keep the full list regardless of classroom participation. Check your saved tests and actual results; do not assume a classroom completion count.

The Full List of 22 Assigned Examples

22 selected IDs. Classroom tests count.

Foundation

US-00-E01 • US-00-E02 • US-00-E03 • US-00-E04 • US-00-E05

Shipping

US-02-E01 • US-02-E02 • US-02-E03 • US-02-E04 • US-02-E05 • US-02-E06 • US-02-E07 • US-02-E08 • US-02-E09 • US-02-E10 • US-02-E11

Promotion

US-01-E01 • US-01-E02 • US-01-E03 • US-01-E04 • US-01-E05 • US-01-E06

The reference pages at the end show every input, action and expected amount. Use the same IDs in test names or comments.

Write Tests for the Supplied Examples

Use all 22 assigned examples. Compare each with your saved tests and actual results. Keep completed checks and add missing ones. Do not assume a classroom completion count or remove examples from the list. Identify examples in test names or comments; no separate map is required. Assert the expected results. The feature/discount-and-free-shipping baseline already implements the assigned behavior. Use the supplied examples to write tests; keep production code unchanged. A test may cover equivalent example IDs. Run the suite and inspect the actual results; no results file, report or log submission is required. Do not invent combinations, claim exhaustive coverage, repair production behavior or use AI. Stop at the budget and label unfinished work. Also write your own Day 2 ORID reflection in records/orid.md and submit it for the next morning's group standup.

© 2026 Inspire | Confidential

Submit Your Code, Tests and ORID Reflection

1	project code, example tests and saved code version
records/orid.md	personal Day 2 ORID reflection and next action

No separate test map, results document, reports or logs are required.

© 2026 Inspire | Confidential

The Work Stops at 60 Minutes

10 min	Check the Baseline and Example List
40 min	Automate the Remaining Examples
10 min	Run and Submit the Evidence

At the limit, keep unfinished examples, blockers, help and recovery use visible. Submit the actual state.

© 2026 Inspire | Confidential

Keep Your Attempt When You Need Help

Continue your saved classroom project based on feature/discount-and-free-shipping, including your tests. Run the supplied Maven wrapper from the project root. Use ./mvnw test on macOS or Linux, or .\mvnw.cmd test in Windows PowerShell. Keep your classroom work when submitting it to your assigned personal homework repository.

Use the correct completed Day 1 baseline. Do not use the review candidate. Preserve your attempt and label recovery use.

If blocked, keep your attempt and ask the coach for help. Use a separately labelled recovery copy only when needed.

Your Class Provides the Task and Submission Entry

Task and resources	Open the formal task entry supplied by your instructor.
Personal repository	Use your assigned individual Homework repository and the demonstrated submission steps.
Help channel	Use the contact supplied for your class. Report resource or permission problems.

Submit before 22:00 on the training day, Asia/Shanghai. The instructor must supply the actual class links.

© 2026 Inspire | Confidential

Push to Your Homework Repository

Commit your code, tests and ORID first. Open your assigned `d02-hw-<your-GitHub-username>` repository and copy its HTTPS URL.

```
git remote -v
git remote add homework "HOMEWORK_REPO_URL"
git push homework HEAD:main
```

Replace `HOMEWORK_REPO_URL` with the copied URL. Keep `origin`. If `homework` already has the correct URL, skip the add command.

Refresh GitHub and check your latest commit, code, tests and records/orid.md on main. Ask the coach if access or remote commits block the push; do not force-push.

© 2026 Inspire | Confidential

Can You Find Your Starting Point?

Locate your saved classroom project and tests.

Where will you continue? Where will you submit? How will you ask for help?

1 minute to locate the entries. Tell the coach now if an entry or permission is missing.

Expected Values and Actual Runs Both Matter

Amounts	original(), memberPrice(), promotion(), goods(), shipping(), total()
Display	Check the required fields and values from QuotePrinter.format; member_price= is the display key.
Run	Run the suite and inspect its output. Submit the code and tests; no separate map, results file, reports or logs are required.
AI	Work without AI assistance. All 22 selected examples are assigned. Count only your actual complete tests; do not assume a classroom completion count or rewrite checks that are already complete.

© 2026 Inspire | Confidential

Identify Examples in Your Test Code

Example ID	Put the checked example IDs in test names or comments.
Checks	Use assertions to check the expected amounts and display fields.
Submission	Submit code, tests and ORID only. No separate map or results file is required.
Equivalent inputs	One test can cover equivalent IDs when the relevant assertions remain protected.

Equivalent IDs can share a test when its assertions protect each required result. Count the checked behavior before counting methods.

© 2026 Inspire | Confidential

Tomorrow You Will Explain the Submitted Work

Traceability	Can every assigned ID be found in a test?
Correctness	Do expected values come from the supplied example? Are the required fields checked?
Evidence	Did you run the submitted tests and inspect the actual output? No result report is required.

What code, tests and ORID file will you submit? What if a test is still red?

Tomorrow everyone shares the already graded work. Keep the submitted version and score fixed; continue later learning in your own working project.

Write Your Day 2 ORID Reflection

records/orid.md

Summarize your Day 2 experience in four sections using ORID. O (Objective) describes what happened; R (Reflective) describes your feelings; I (Interpretive) explains what you learned and what it means to you; D (Decisional) states your next action.

Choose how much personal feeling to include. You may state in the R section that you prefer not to share it. There is no word count requirement.

Write the reflection yourself and use it to prepare for the Day 3 group standup.
