HOMEWORK

Display Zones and Delete Local Records

© 2026 Inspire | Confidential

Each Record Shows Its Submitted Zone

Individual homework · 60 minutes total · No AI assistance

Continue from your classroom local UI.

- Show the selected zone on every submitted record.
- Keep each record’s weight, service and zone correct.
- Changing the form selection leaves earlier records unchanged.

Use the existing parcel controls, React props, local state and event handlers.

© 2026 Inspire | Confidential

Delete Removes Only the Chosen Record

- Add a Delete button to each record. Remove that record immediately.
- Preserve the values and order of all remaining records.
- Show an empty-list message after deleting the final record.
- Allow new records to be added after deletion.

Use a parent callback, a new array and stable record ids as keys.

New Behavior and Regression Checks

1. Add several records with different values. Check weight, service and zone.
2. Edit the form. Check that earlier records stay unchanged.
3. Delete a middle record. Check the remaining values and order.
4. Delete all records, check the empty message, then add again.
5. Check valid input, invalid input rejection and correction.

Run these checks and fix any problems you find.

Submission Checklist

- local UI code with zone display and record deletion
- `records/orid.md` — personal Day 8 ORID reflection

Submit to your assigned individual homework repository.

No API calls, database storage, price calculation or new parcel input controls.

Your Day 8 ORID Reflection

Write your own reflection in `records/orid.md`. Use it for the Day 9 group standup.

O · Objective	What did you do or observe today?
R · Reflective	How did you feel?
I · Interpretive	What did you learn? What does it mean to you?
D · Decisional	What will you do next?

Choose how much personal feeling to share. Submit your reflection with your homework.
