The Failure: Given, When, Then, Actual

Given	In the supplied fault copy, save a quote with weight_kg 3, zone local and service standard. The saved record initially displays 1300 cents. Keep the returned id and the backend running.
When	Reload the browser page and locate the same record id in the saved list.
Then	The same record should still display 1300 cents.
Actual	The same record displays 13 cents after reload.

Record How Your Understanding Changes

records/investigation.md

I know ...

Write your own record here.

I suspect ...

Write your own record here.

I found ...

Write your own record here.

I know ...

Write your own record here.

In records/investigation.md, use I know, I suspect, I found and updated I know. Compare two causes and their predicted observations before choosing a distinguishing check.

Explain the Supported Causal Chain

records/causal-chain.md

Defect → Error → Failure

In records/causal-chain.md, explain the supported Defect → Error → Failure links in system order and cite the relevant investigation evidence. Mark unsupported links as unknown.

Explain how the failure happened. Investigation notes explain why you believe it.

Check the Repair with Actual Results

records/investigation.md · Repair and verification

1. Repair the supported cause without changing business rules. In records/investigation.md identify the diff or commit, repeat the same check before/after, and record relevant regression commands, actual results and versions.

2. Record evidence limits, unfinished work, blockers and the next check in records/investigation.md. Do not claim an unverified fix.

Keep optional screenshots or raw logs under records/evidence/ and link them from records/investigation.md. Do not commit credentials, dependency folders, build outputs or database files. Text observations are sufficient; screenshots and SQL are not mandatory.

Your Day 9 ORID Reflection

records/orid.md · Prepare for the Day 10 group standup

O · Objective	What did you do or observe?
R · Reflective	How did you feel?
I · Interpretive	What did you learn? What does it mean to you?
D · Decisional	What will you do next?

Write it yourself. Choose how much personal feeling to share.
