INSPIRE AI

HOMEWORK

Run Maven Tests with GitHub Actions

© 2026 Inspire | Confidential

Start from Your Classroom Project

Individual homework · 45 minutes, including ORID and submission

Use your own project from the classroom exercise where you moved pricing tests from the API layer to the Service layer.

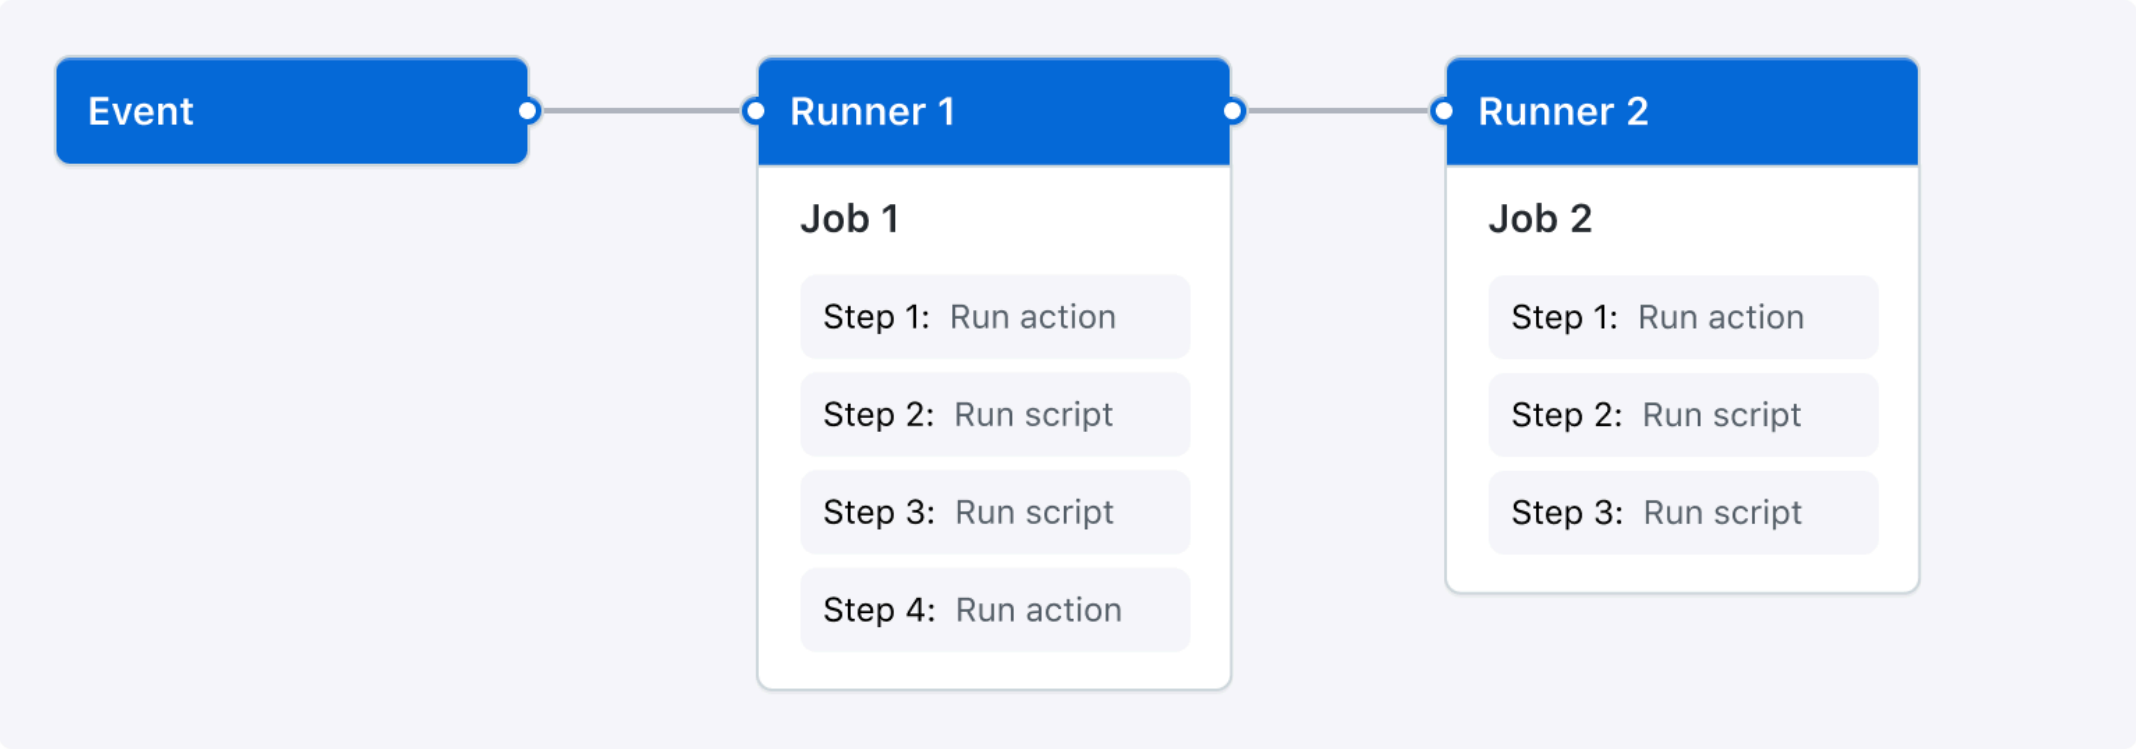

- `.github/workflows/test.yml`
  GitHub Actions workflow for the full Maven test suite
- `records/orid.md`
  Personal Day 10 ORID reflection

Push both files to the assigned branch by 22:00 on Day 10.

What Happens When You Push?

Push → workflow starts → runner executes the job → check the Actions log

For this homework, run one job on Ubuntu. Diagram by GitHub Docs · CC BY 4.0

Use AI to Draft the Workflow

Optional AI prompt

Draft `.github/workflows/test.yml` for pushes to my assigned branch. Use one job on `ubuntu-24.04`. Check out the pushed commit, set up Java 21, and run `./mvnw test` from the project root. Explain each step and how to verify the test result in the Actions log.

Run the Full Maven Suite on Push

One workflow · One job · Push to the assigned branch

1. **On your own computer.** Run `./mvnw test` from the project root to check the local baseline. In Windows PowerShell, run `.\mvnw.cmd test`.
2. **In GitHub Actions.** Set `runs-on: ubuntu-24.04`, check out the pushed commit, and set up Java 21. Run `./mvnw test` from the project root.

AI may draft, explain, or troubleshoot the YAML. Review it yourself before pushing.

Check the Test Run in GitHub Actions

1. Open the run triggered by the push for your submitted commit.
2. Check that the full Maven suite ran and passed, and the workflow passed.
3. If something blocks the run, check the available logs and contact your coach when you need help.

Your instructor checks the run directly in GitHub Actions.

Write Your Day 10 ORID Reflection

records/orid.md · Bring it to the Day 11 group standup

O · Objective	What did you do or observe?
R · Reflective	How did you feel?
I · Interpretive	What did you learn? What does it mean to you?
D · Decisional	What will you do next?

Write it yourself without AI. Choose how much personal feeling to share.
