Homework · Clarify E-Voucher Rules

- Work individually for about 40 minutes. Ask specific questions to confirm the e-voucher rules, then write and check your own behavior examples. Write your own Day 1 ORID reflection and prepare for the next morning’s group standup.
- Use only the supplied business requester Agent. No coding or other AI assistance.
- The Agent confirms specific cases or rule statements. Choose, explain and write the examples yourself. Do not request its reference examples or ask it to write your work.

Individual work · about 40 minutes · three files

The New Request

> A shop plans to let customers use e-vouchers. A nonmember buys goods with an original price of RMB 120 and presents an RMB 20 voucher. Will the purchase still qualify for free shipping? Ask the business Agent about specific situations or rule statements. Confirm how the voucher affects the quote, and write checkable examples.

> What do you need to confirm before writing expected results?

User Story and Initial Acceptance Criteria

User story

As a	customer with an e-voucher
I want	**to know whether I still qualify for free shipping after using it**
So that	I know the amount I need to pay.

Source story: US-03

Initial acceptance criteria

US-03-AC06	Customers can use an e-voucher to reduce the order amount. Show the correct amount payable.
US-03-AC07	Existing member discounts and promotions still apply when an e-voucher is used.
US-03-AC08	After an e-voucher is used, orders that qualify for free shipping on orders of RMB 100 or more still have no shipping charge.

Selected criteria for US-03 • rules, not recorded test results

File 1 • Your Own Behavior Examples

- records/examples.md
- Write your own Given / When / Then examples, not rewritten AC. Include membership status, original price, voucher use and the business action.
- State the expected goods amount, shipping fee and total. Cite a classroom record or a numbered Agent reply for every expected result.
- Explain how at least one example distinguishes two possible business meanings. There is no fixed example count.

File 2 • The Complete Agent Dialogue

- records/agent-dialogue.md
- Click Export Markdown to download all retained conversations. Save the complete export at this path, including failed attempts and later corrections.
- Keep the exported conversation and message IDs. Do not renumber messages, remove attempts or replace original answers.
- Append unanswered business questions after the complete record. Browser history or a link alone is not a submission. The dialogue shows your own questioning and clarification.

File 3 • Your Day 1 ORID Reflection

records/orid.md • Write your own Day 1 reflection.

- O • Objective: What happened?
- R • Reflective: How did you feel?
- I • Interpretive: What did you learn?
- D • Decisional: What will you do next?

No word count is required. In R, you may say that you prefer not to share personal feelings. Use your reflection for the Day 2 group standup.

Confirm the New Boundaries

- Compare no-voucher behavior with voucher cases below, exactly at and above the free-shipping threshold, using the confirmed basis for that threshold. Explain the effect on shipping eligibility.
- Check goods amounts before voucher deduction below, equal to and above the voucher value. Confirm the actual deduction, remaining goods amount and any effect on shipping fees.
- Treat an original price of zero and a positive original price with zero goods payable after voucher use as separate cases. Confirm all amounts and shipping behavior.

These are questions to resolve. The new business answers are yours to clarify.

What Makes the Work Complete?

- Cover voucher use by members and nonmembers, both when the existing promotion condition is met and when it is not. Confirm whether offers combine, their calculation order and any effect on the promotion condition.
- Cover the key new rules and boundaries. One example can answer several questions; do not repeat every combination of the old discount and promotion rules.
- Assessment looks at your confirmed business results, your own questioning and explanation, and traceable sources. It is not based on example count, dialogue length or matching reference numbers.
- No coverage labels, coverage matrix or separate coverage self-audit are required. Keep unresolved business questions explicit.

Watch: Save an Answer and Cite It

- Ask one specific question about a no-voucher case confirmed in class. Check the actual reply against the classroom record.
- Click Export Markdown and save the complete download. Cite its actual answer ID in your example.

> Example IDs: **Q01.001 / A01.001**
> Example source: **A01.001**

Use the actual IDs in your export. Keep the original reply and any later correction. Keep conflicting replies and ask your coach to check.
