Prepare for the Day 4 Homework

© 2026 Inspire | Confidential

Homework: Complete the Shared Responsibilities

Complete the common object collaboration while preserving stock checking and all-or-none reservation.

Continue your personal classroom stock project. Complete immutable shared demand, inventory-owned whole-request sufficiency and the all-or-none reservation update. Both public services construct a request and delegate. Choose a safe migration order and protect the risks with effective tests. Keep shortage details as an unimplemented plan. Equivalent names are allowed. Use real earlier completion against the same final checklist. Also write your own Day 4 ORID reflection in records/orid.md for the Day 5 group standup.

Every Submission Meets the Same Contract

Immutable request

One immutable request object combines repeated-item quantities. Both public entries use it. Services do not repeat aggregation or expose mutable totals.

Inventory guarantees

Inventory owns whole-request sufficiency and the all-or-none update guarantee. Public services construct a request and delegate, without per-item stock checks or deduction loops.

Service collaboration

Both original callers actually use the new collaboration, and old duplicate logic is removed. A helper, unused class or renamed method alone does not meet the contract. Equivalent names are allowed.

Retain Every Common Checking Example

Example and action	Given	Expected result
US-01-E01 Check the request.	Stock **A: 4, B: 2** Request in order **A × 1, B × 1, A × 2**	Can fulfil **true** Stock **A: 4, B: 2**
US-01-E02 Check the request whose total for A exactly equals available stock.	Stock **A: 4, B: 2** Request in order **A × 2, B × 1, A × 2**	Can fulfil **true** Stock **A: 4, B: 2**

Selected expectations. Observation: Not recorded.

Check the Combined Request Boundary

Given	Stock **A: 4, B: 2**	Request in order **A × 3, B × 1, A × 2**
When	Check the request whose individual lines fit but whose total for A exceeds stock.	
Then Expected result	Can fulfil **false**	Stock **A: 4, B: 2**

Observation: Not recorded

Source example: US-01-E03

Retain Both Successful Reservation Examples

Example and action	Given	Expected result
US-02-E01 Reserve the request.	Stock **A: 5, B: 3** Request in order **A × 1, B × 2, A × 1**	Accepted **true** Stock **A: 3, B: 1**
US-02-E04 Reserve the request whose total for A exactly equals stock.	Stock **A: 4, B: 2** Request in order **A × 2, B × 1, A × 2**	Accepted **true** Stock **A: 0, B: 1**

Selected expectations. Observation: Not recorded.

Keep Every Stock Value After Rejection

Example and action	Given	Expected result
US-02-E02 Reserve the request when the second item has insufficient stock.	Stock **A: 5, B: 1** Request in order **A × 2, B × 2**	Accepted **false** Stock **A: 5, B: 1**
US-02-E03 Reset stock and reserve the same request with the insufficient item first.	Stock **A: 5, B: 1** Request in order **B × 2, A × 2**	Accepted **false** Stock **A: 5, B: 1**

Selected expectations. Observation: Not recorded.

Keep Stock After a Combined Shortage

Given	Stock **A: 4, B: 2**	Request in order **A × 3, B × 1, A × 2**
When	Reserve the request whose individual lines fit but whose total for A exceeds stock.	
Then Expected result	Accepted **false**	Stock **A: 4, B: 2**

Observation: Not recorded

Source example: US-02-E05

Confirm Your Starting Project and Help Route

Your stock classroom result

Continue your saved classroom code and tests; record the starting version.

Check the starting point

Confirm your personal Day 4 Homework repository and the help route with your instructor.

Open the real submission repository and help entry provided by your instructor.

© 2026 Inspire | Confidential

Keep the Explanation Brief and Checkable

Design reasoning

Briefly explain the changed knowledge boundary, collaboration and dependency cost; do not add classes only to match a count or a pattern name.

Actual checks and support

Record the starting version, actual baseline and final test commands/results, help, recovery and unfinished work.

© 2026 Inspire | Confidential

Add Your Homework Remote and Push

Use code and Git history as evidence. Add your submission remote with

```
git remote add homework YOUR_DAY4_HOMEWORK_REPO_URL
```

Replace YOUR_DAY4_HOMEWORK_REPO_URL with the clone URL of your own Day 4 Homework repository supplied by your instructor. If homework already points to that repository, reuse it instead of adding it again. Check its URL with

```
git remote -v
```

then submit with

```
git push homework HEAD:main
```

No separate diagram, screenshot or log package is required.

Submit One Complete Project Repository

Business scenarios and clean tests

Cover the required business scenarios and boundaries. Keep test names, setup, calls and assertions clear. No code coverage tool, report or percentage is required.

Clear production code

Remove old duplicate logic as responsibilities move. Keep production code clear; do not add classes or refactor further only to earn marks.

Small Conventional Commits

Use small commits with clear Conventional Commit messages. Run tests and inspect the diff before committing each passing refactoring step. New protection tests may pass immediately; no forced Red is required.

Keep the proposed shortage-detail task list in README. Use your runnable code, tests and commits as evidence. Tomorrow each learner shares their own graded submission.

© 2026 Inspire | Confidential

Use Your Real Progress Within the Time Limit

Time	Spend no more than 60 minutes, including the README and ORID reflection.
Work	Individual work without AI assistance
Scope	Preserve both boolean public entries, all assigned results, query read-only behavior and all-or-none reservation. Do not implement shortage details or add new business rules.

Keep shortage details as a plan. Label help, recovery and unfinished work. No extra edits are required after the full common contract is met.

Write Your Day 4 ORID Reflection

records/orid.md

Summarize your Day 4 experience in four sections using ORID. O (Objective) describes what happened; R (Reflective) describes your feelings; I (Interpretive) explains what you learned and what it means to you; D (Decisional) states your next action.

Privacy and length

Choose how much personal feeling to include. You may state in the R section that you prefer not to share it. There is no word count requirement.

Prepare for the group standup

Write the reflection yourself and use it to prepare for the Day 5 group standup.
