Summarize Day 11 with a Concept Map

© 2026 Inspire | Confidential

Start with the Focus Question

How does a change in user-visible behavior become part of the Living Spec in OpenSpec?

Recall · 5 min	Put the focus question at the top. Choose the ideas that help answer it.
Map · 15 min	Connect observable behavior, the change, its spec delta, archive, and the Living Spec.
Label each link	Read two connected concepts and their linking words as one meaningful statement.

Check One Link and Keep an Open Question

Use 10 minutes to check the meaning of one relationship.

Check one link	Use a Day 11 slide or a classroom file. Add the source and your conclusion inside the map.
Keep one question	Add one question you still have about the behavior or workflow. Mark any uncertainty clearly.
Bring it tomorrow	Explain the checked relationship and the open question in the Day 12 homework review.

Submit Two Files

Work individually for 40 minutes. Use the final 10 minutes for ORID, a final check, and submission.

Concept map	`records/sdd.svg` · Export the map as an SVG file.
Personal ORID	`records/orid.md` · Write your own Day 11 reflection.

Save both files in your assigned individual homework repository. Submit by 22:00 on the training day (Asia/Shanghai).

Your Day 11 ORID Reflection

Use these four prompts in your own words. There is no word count requirement.

O · Objective	What happened today?
R · Reflective	How did you feel? Share only what you choose to share.
I · Interpretive	What did you learn, and what does it mean to you?
D · Decisional	What will you do next?

Bring your reflection to the Day 12 group standup.
