STAND-UP

Standup Meeting

© 2026 Inspire | Confidential

Share one event and choose one next action

Objective · what happened	Describe one event or result from the previous training day.
Reflective · how you felt	Name a feeling. Share only what you choose to share.
Interpretive · what it means	Explain the learning you take from that event.
Decisional · what next	State one action you will take into the rest of the day.

Team Forming — Re-form Teams

Four SDD roles, one roster

© 2026 Inspire | Confidential

Scrum optimizes the team; SDD orchestrates the AI

Scrum answers how a human team delivers value. OpenSpec SDD answers how humans direct AI to build precisely.

SCRUM

Human team, business value

· PO owns backlog, stories and value.

· Developers design, code and test.

· Optimizes collaboration, flow and feedback.

SDD · OPENSPEC

Human + AI, precise execution

· Intent Owner: boundaries + acceptance.

· Spec Architect: machine-readable Spec.

· AI Orchestrator: context, tools, path.

· Verification Lead: zero-trust audit.

AI Orchestrator = manager of context, tools and execution path

© 2026 Inspire | Confidential

Four roles, four capability shifts

The shift is from doing the task to defining, orchestrating and verifying it.

Product Owner Backlog · stories · value communication	→	**Intent Owner** Strict boundaries · acceptance criteria · zero ambiguity
Senior Developers Architecture · database · core code	→	**Spec Architect** Machine-readable Spec · unambiguous rules; no hand-coding
Execution Developers Sprint tasks · manual code · debugging	→	**AI Orchestrator** Context · tools · execution path; prompts + agents
QA / Testers Test cases · manual / API testing	→	**Verification Lead** Zero-trust audit · white-box review · closed-loop verification

© 2026 Inspire | Confidential

Role map: outputs and capabilities change

A one-page view of the four shifts.

Traditional Scrum role	SDD mapped role	Output change	Capability shift
Product Owner	Intent Owner	User stories → intent + acceptance criteria	Requirements talk → boundary + value definition
Senior Developers	Spec Architect	Architecture + code → machine-readable Spec	Code implementation → zero-ambiguity translation
Execution Developers	AI Orchestrator	Hand-written code → agent flow + AI code	Syntax skill → context + path orchestration
QA / Testers	Verification Lead	Bug reports → spec audit + verification loop	Functional walkthrough → white-box AI audit

Scrum Master: no engineering production in the OpenSpec SDD map; becomes the process guardian for spec-first discipline — prevents the team from slipping back to code-without-spec.

Idea

Scenario: With independent travel becoming the mainstream, many tourists are no longer satisfied with traditional group tours. However, they face new challenges:

- Information overload and difficulty in making choices
- Lack of localized experiences
- Time-consuming itinerary planning
- Can't grab tickets!!
- ...

Currently, although there are many travel apps available, most of them provide standardized information. Therefore, a platform that can intelligently recommend customized local routes, unique activities, and hidden gems based on users' interests, travel time, budget, and group size would present a highly attractive business opportunity.

Lightweight Discovery

From problem space to MVP

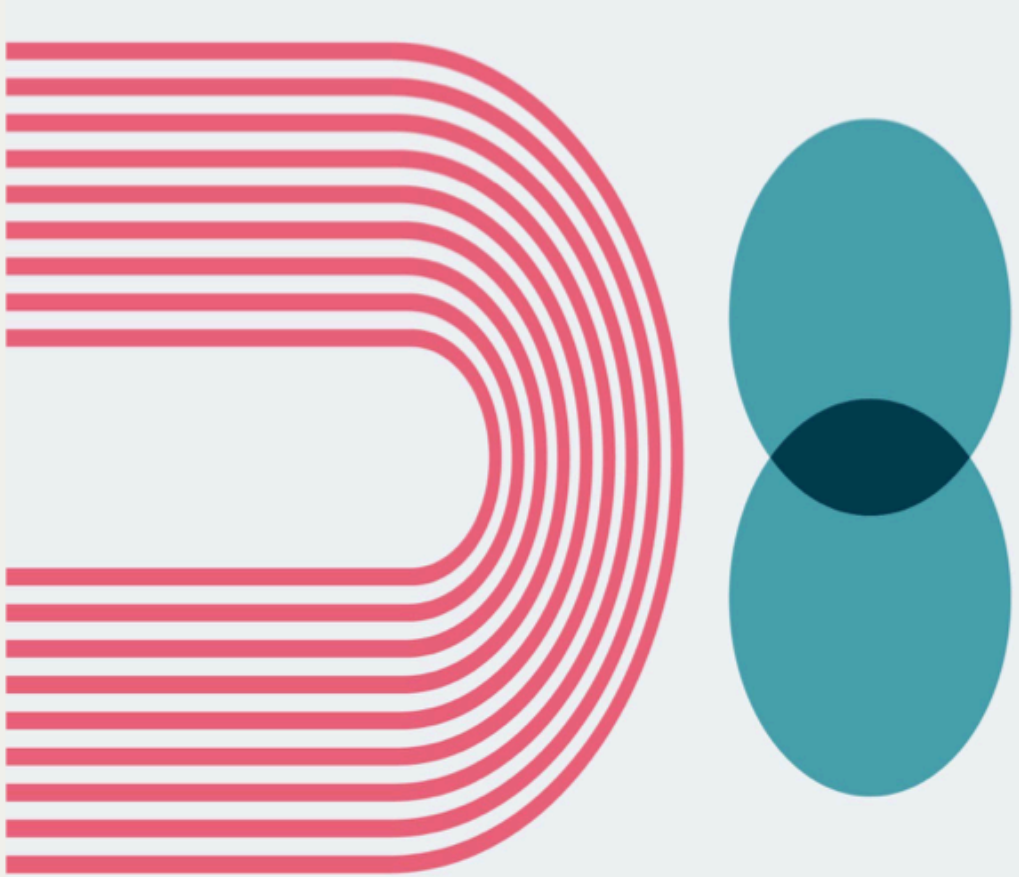

© 2026 Inspire | Confidential

Build the right thing — then build it right

Problem space first. Solution space second.

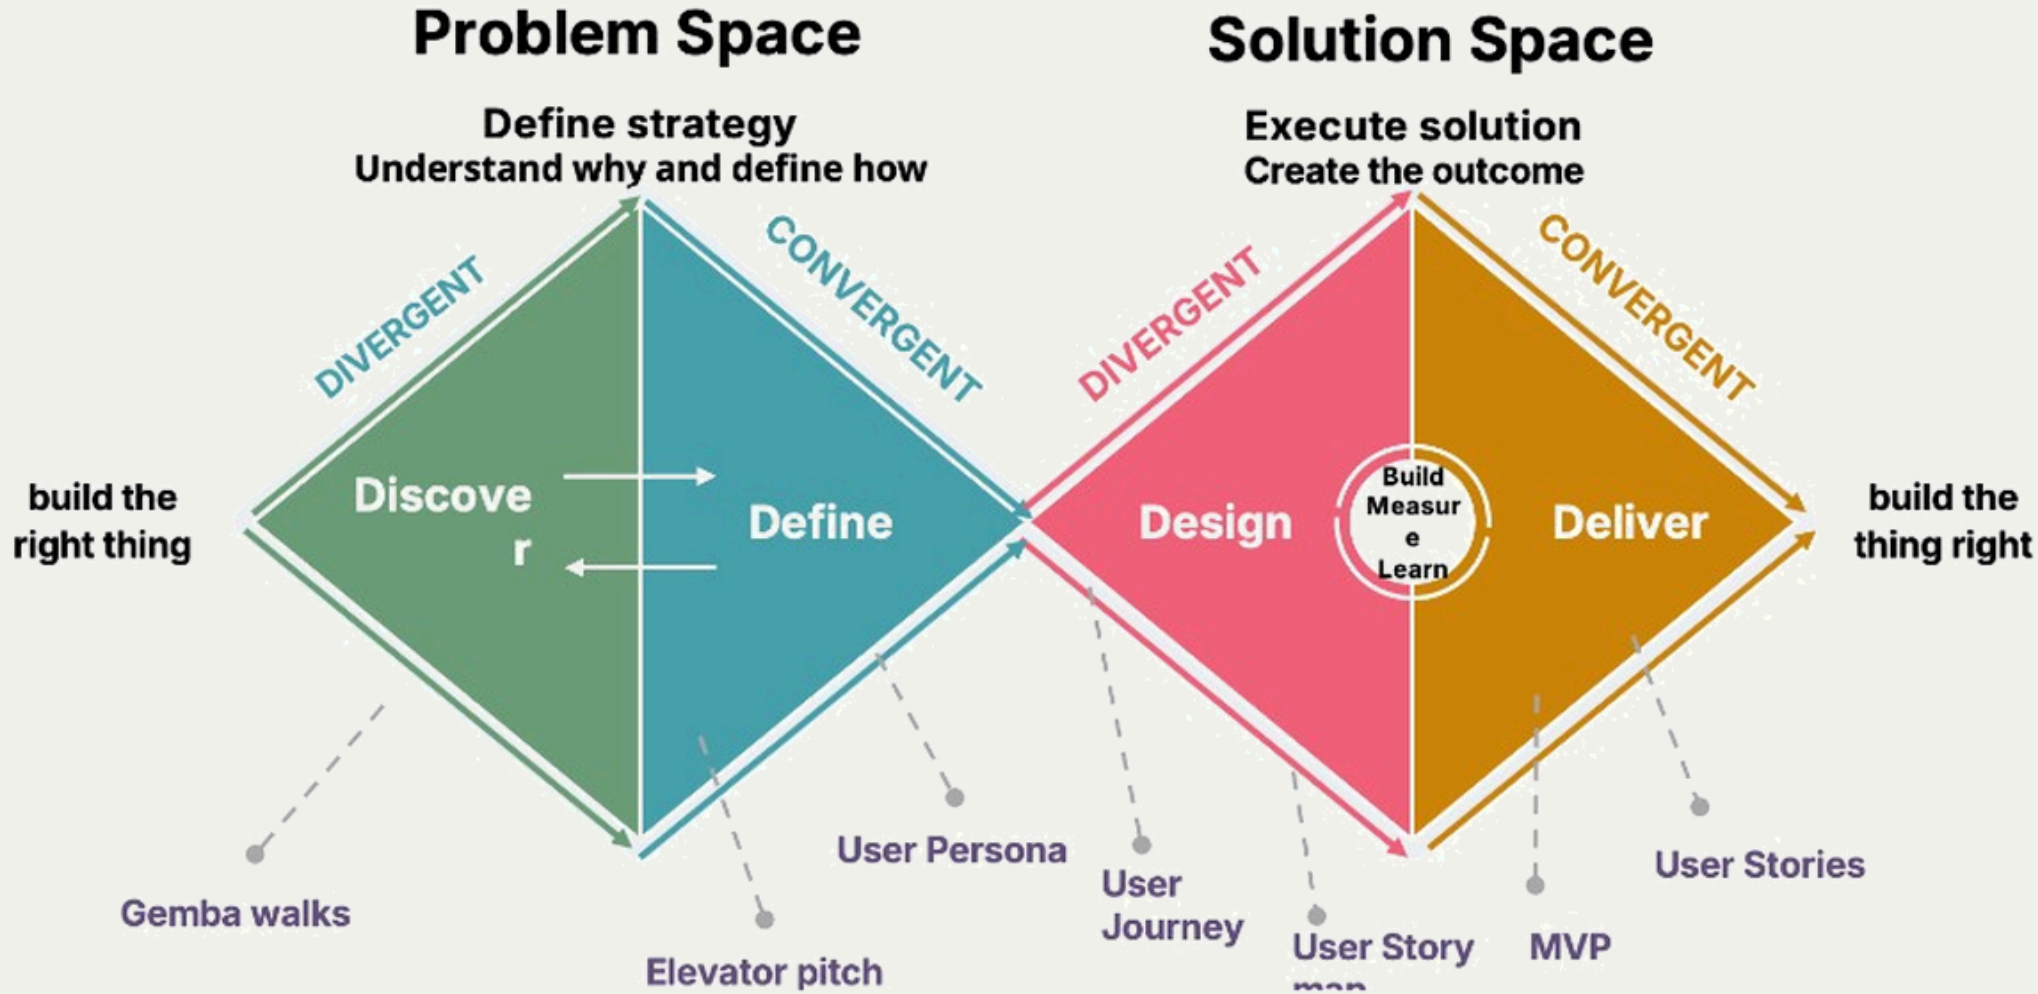

Design-thinking inception: Discover → Define → Design → Deliver.

Discovery is a decision path — not a document pile.

© 2026 Inspire | Confidential

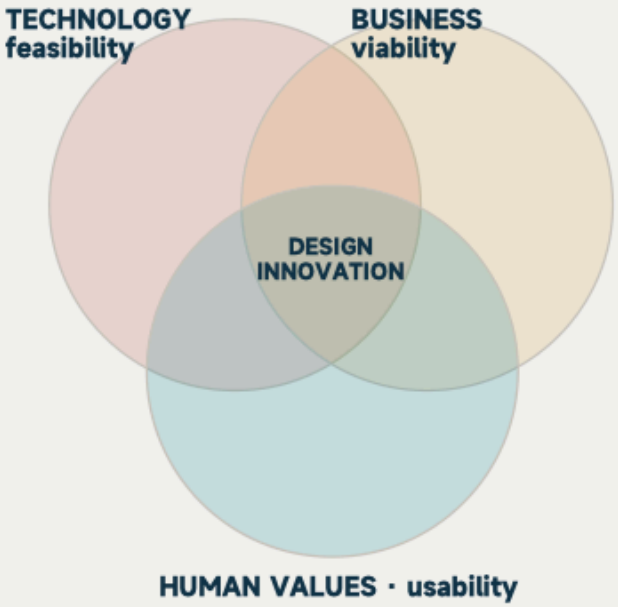

Design Thinking

© 2026 Inspire | Confidential

Design Thinking: a collaborative workshop

Start with human values. Explore the problem, then converge on a solution worth building.

SIX MOVES

01 **Understand**
What people do, say and feel

02 **Observe**
Watch the real work, not the demo

03 **Define POV**
Frame one problem worth solving

04 **Ideate**
Generate options before choosing

05 **Prototype**
Make the idea concrete

06 **Test**
Learn with users, then iterate

THE ROOM

A diverse team
Architect · developer · product owner · solution manager · knowledge management · UI designer

A space that can change
Whiteboards · glass walls · high tables · prototyping materials

A rhythm of two diamonds
Diverge, converge — first on the problem, then on the solution

Elevator Pitch

WHO · WHAT · WHY

© 2026 Inspire | Confidential

WHO · WHAT · WHY

01 Focus user

Who is the core customer?

02 Provide value

What pain or gain matters?

03 Unique edge

Why you — not the competitor?

04 One breath

If it needs a deck, it is not a pitch.

© 2026 Inspire | Confidential

Elevator pitch canvas

For [target customer]

Who wants [problem or opportunity]

The [product name] is a [category]

That [key benefit]

Unlike [competitor], we [difference]

User Journey

AS-IS · TO-BE · MVP stretch

© 2026 Inspire | Confidential

User persona: a B2B example

A persona turns interview evidence into a shared view of one user.

ROLE

Network Operations Center monitor

"Alert data is huge. It is hard to tell a real problem from a false alarm."

RESPONSIBILITIES

- Watch alerts; assess status.
- Lead dispatch and tracking.
- Provide reporting material.

WORK SCENARIOS

- Judge severity; raise a ticket.
- Coordinate NOC engineers.
- Support major incidents.
- 5-person rotation.

PAIN POINTS

- Too much alert data.
- Logs need expert tools.
- Complaints lack detail and location.
- Handling information is lost.

EXPECTATIONS

- Automatic fault boundary.
- Past cases for manual triage.
- Visible repair progress.
- Handle within group SLAs.

User journey map: make the experience visible

A visual story of what a user goes through to reach a goal.

PHASES	Awareness	Consideration	Purchase	Use	Loyalty
ACTIONS	Notices a need	Compares options	Buys	Uses the product	Returns / recommends
TOUCHPOINTS	Ad	Website	Store	App	Support
EMOTION	neutral	anxious	interested	relieved	loyal
PAINS	Unclear need	Too many options	Checkout friction	Hard onboarding	Support wait
GAINS	Confidence	Clarity	Speed	Value	Trust

The New Patient's Journey

Opportunities to impact the experience at ABC Health

Newbie Natalie

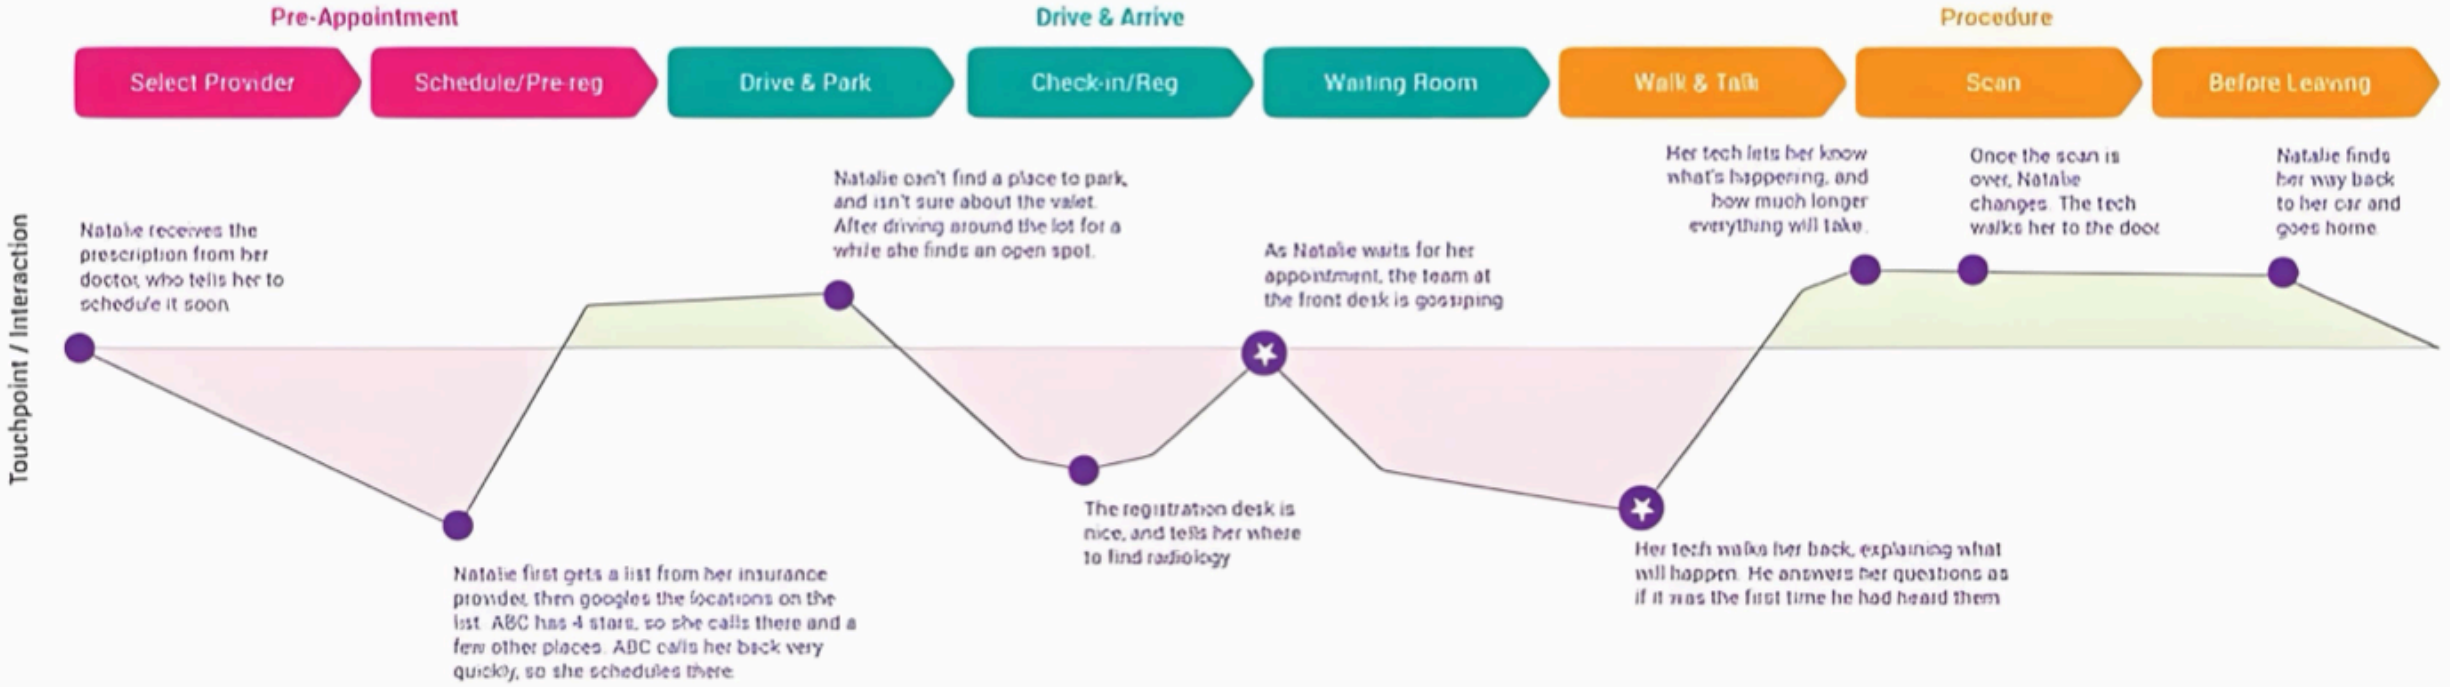

Age	34
Background	This is Natalie's first time for an MRI, so she's a bit anxious about it.
Insight	Natalie's doctor's office printed out some WebMD pages about MRIs to help her understand what to expect.

Experience Factors

Legend

- Median satisfaction level
- Natalie's route
- Satisfaction up
- Satisfaction down
- **Moment of Truth** — A critical interaction

Thoughts

"My doctor didn't help me find a place at all. They just gave me a script."	"It seemed strange to me that only one hospital called me back. But they seemed really nice on the phone, and they were close to my home."	"I've never been here before. Which entrance do I use?"	"This place is in the basement?"	"Wow, how unprofessional. Did I make the right decision coming here?"	"I felt much better once I was with the tech. He was very professional and kind"	"Every time I started getting nervous, he checked in and kept me encouraged"	"Once the procedure was over, I guess it was just done."

PRACTICE

MVP

Cut the thinnest learning slice

© 2026 Inspire | Confidential

Maximum validated learning · least effort

Ship a skateboard, not a wheel. Every release must move someone.

© 2026 Inspire | Confidential

Valuable · Usable · Feasible

01 Valuable
Solves a real user pain noticeably.

02 Usable
Someone completes the job end-to-end.

03 Feasible
Shippable in the iteration window.

04 Delight
One sharp moment — not polish everywhere.

© 2026 Inspire | Confidential

Cut MVP and the first release plan

On the Story Map: mark MVP · Iteration 1 · Iteration 2.

Prepare three examples: happy · sad · one uncertainty.
