Set Up the Group Workspace Tonight

One page, five jobs. Split them across the group and finish them before Monday.

MVP backlog	Record every MVP story as a backlog card: Title: <short name> Story: As a <role>, I want <capability>, so that <benefit> Acceptance criteria: Given … When … Then … Priority: Must / Should / Could / Won't
Team Kanban	Create a GitHub Projects board and use it as the team Kanban.
CI pipeline	Create a GitHub Actions workflow as the team CI pipeline.
P0 baseline	Clone the latest afs-2026-zha{CLASS_X}/ai4se-baseline. Rename your group's rename-this repository to your product name, then push the baseline to afs-2026-zha{CLASS_X}-group-{Y}/<your-product-name>. Example: class 2 group 2 pushes to afs-2026-zha2-group-2/<your-product-name>.
Baseline TODO	Complete the tasks in TODO.md at the repository root, and keep the project on the same technology stack.
